Who needs ACCESS?

You do.

Because ACCESS gives you--well, access--to the home technology solutions that can really turn a house on.

Like home theater. Monitored security. Whole house audio and video. Home automation. Lighting control. Computer networking and communications.

**ACCESS**  
lets you feel good about being home where you can watch movies as if you were in a movie theater, listen to music anywhere in the house, turn lights on and off before and after you enter or leave a room from a single control panel. And of course connect to the outside world at lightning speed via the Internet and the telephone.

**ACCESS**  
also lets you feel good about being away from home with monitored security systems and advanced controls that let you adjust lights, heat, blinds, fans, cameras, garage doors (and many other devices) from anywhere in the world via the Internet.

What's more, ACCESS will also give you--well, access--to a higher price for your home whenever you're ready to move. Often as much as 14% more.

All in all, when you have ACCESS, you won't have to dream about the kind of home you want. You can live in it.
